How to Use This Code

Kui Chen

1. About This Project

This project is one assignment of Coursera Machine Learning Specialization Part 3 Classification, Week 2. The project is made from Python and Jupyter Notebook. The target of it is to test the performance of linear classification with L2 regularization.

2. Install GraphLab

Before running the notebook, you should install GraphLab first. This link will give you the information about installing GraphLab:

https://turi.com/download/install-graphlab-create.html

and you can get document of GraphLab from its home page:

https://turi.com/

3. Reference

I study this course before doing the assignment:

https://www.coursera.org/learn/ml-classification/home/week/3

Any Question and Advice Are Welcome! Thank You!
